

Amazing Technology May Relieve Serious Back Pain!

DON'T LET BACK PAIN GET IN THE WAY OF YOUR GOLF, BASEBALL, OR SOFTBALL SUMMER FUN!

Do You Have Any of the Following Conditions?

- Sharp Pains in the Back of the Leg
- Lower Back Pain
- Herniated/Bulging Discs
- Numbness in Your Arms or Legs
- Shooting Hip or Thigh Pain
- Muscle Spasm, Sprains & Strains

If you've suffered from any of these annoying conditions, you may have "Sciatica".

Sciatica is a compression of the sciatic nerve, usually by an L4 or L5 disc herniations. As you know, sciatica can be a very painful problem, even crippling at times.

Nothing's worse than feeling great mentally, but physically feeling held back from life because your back or sciatica hurts and the pain just won't go away!

Fortunately, if you are suffering from any of these problems, they may be relieved or eliminated by nonsurgical spinal decompression combined with cold laser therapy.

"What's The Chance This Will Work For Me?"

A medical study found patients went from moderately painful to almost no pain with decompression treatments. Those that took pain pills improved less than 5%.

- Am Society of Anesthesiologist, 2006 Chicago, IL
Another study presented at the American Academy of Pain Management in 2007 showed...

"Patients reported a mean 88.9% improvement in back pain and better function...No patient required any invasive therapies (e.g. epidural injections, surgery)."

These are just two studies out of a dozen done in the last few years, all showing promising results.

Finally, You Have An Option Other Than Drugs or Surgery

New research in a treatment called low level laser therapy, or cold laser, is having a profound effect on patients suffering with pain. Unlike the cutting type of laser seen in movies and used in medical procedures, cold laser penetrates the surface of the skin with no heating effect or damage.

Cold laser therapy has been tested for 40 years, had over 2000 papers published on it, and been shown to aid in damaged tissue regeneration, decrease inflammation, relieve pain and boost the immune system. This means that there is a good chance cold laser therapy could be your pain solution, allowing you to live a more active lifestyle.

Here's the point of all these studies... spinal decompression combined with cold laser therapy has a high success rate with helping disc herniations, sciatica, and back pain. This means in just a matter of weeks you could be back on the golf course, enjoying your love life, or traveling again.

The Single Most Important Solution To Your Sciatica and Back Pain

It's time for you to find out if spinal decompression combined with cold laser therapy will be your sciatic pain solution. For two weeks only, \$97 will get you all the services I normally charge new patients \$250 for! What does this offer include?

- An in-depth consultation about your health and well being where I will listen...really listen...to the details of your case.
- A complete neuromuscular examination.
- Two treatment demonstrations
- A thorough analysis of your exam so we can start mapping out your plan to being pain free.

You'll get to see everything first hand and find out if this amazing treatment will be your pain solution, like it has been for so many other patients.

I'll answer all your most probing question about our pain free sciatica and back pain evaluation and what it can do for you.

The appointment will not take long at all and you won't be sitting in a waiting room all day either. And the best part about it is...

DECOMPRESSION TESTIMONIALS

Since I began the decompression of the spine, I feel as though I have my life back. After the first treatment on the decompression machine, I could feel the difference in the lumbar region of my back. If I had attempted to mow my lawn, in the past, with 20 inch push mower, my back would have been knotted up and the muscles so tight that I'd have been in a great deal of discomfort. Moreover, I'd been visiting Anew Health for several treatments. Now I can engage in normal, everyday activities: lawn mowing, weed pulling, cutting wood and house cleaning without the dire consequences I have experienced in the past. -William H.

"I had a sciatic nerve in my left hip which was going down my left leg down to the foot. I could not walk or stand and I was in excruciating pain. I had been suffering with this problem for about three years. I had tried numerous doctors before visiting Anew Health and they all wanted to treat me with drugs. A Anew Health I received a back adjustment, stretches and decompression. After the first visit I was able to stand and walk - it wasn't painful at all, no pain. I recommend Anew Health to all my friends and at my work." - Stephanie

No Dangerous Drugs, No Invasive Procedures, and No Painful Exercises

Spinal decompression treatments combined with cold laser therapy are very gentle. In fact, I even catch a few patients sleeping during sessions every once and awhile.

"But I feel fine - as long as I take my pain pills."

There's a time to use pain medications, BUT not before seeking a natural way to correct the CAUSE of the problem!

Spinal decompression combined with cold laser therapy just may be the answer that you've been looking for. Ask yourself ... after taking all these pain medications and playing the 'wait and see game', maybe for years... are you any better off?

Call and tell the receptionist you'd like to come in for the Special Decompression & Cold Laser Evaluation.

Call 715-384-9064 today, and we can get started with your consultation and exam as soon as there's an opening in the schedule. **Our office is called Anew Health and you can find us at 106 S. Chestnut Ave. in Marshfield, WI.**

I look forward to helping you get rid of your pain so you can start living a healthier, more joyful life.

*Sincerely,
Margaret Mertens, D.C.*

P.S. The only real question to ask yourself is this...

What Will Your Pain Feel Like one Month From Today?

One of the biggest myths about pain is that it goes away all by itself, without any treatment.

A May 1998 study in the British Medical Journal proved this myth false, showing that 75% of back pain sufferers who do nothing about it will have either pain or disability 12 months later.

Let's face it, if the pain hasn't gone away by now, it's not likely to disappear on its own. Life's too short to live in pain like this. Call today and soon I could be giving you the green light to have fun again.
